

SYSTEM 32

6-POLE, 32 AMP, LIGHTING & POWER

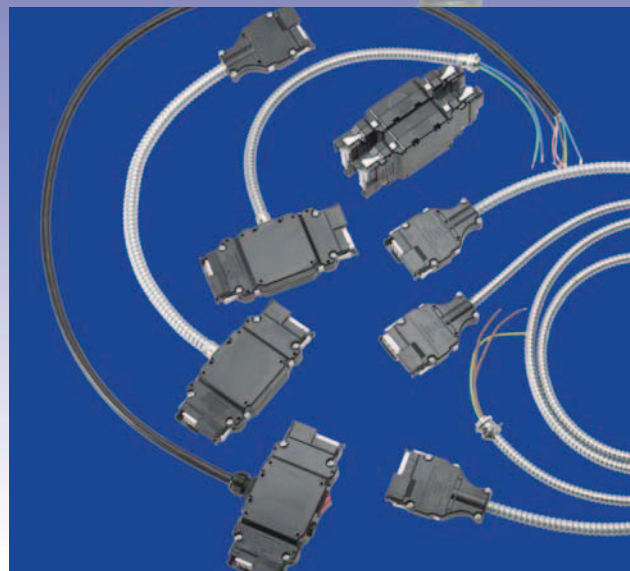

MODULAR WIRING SYSTEMS LTD.

Plug & play
lighting and power
that's truly flexible

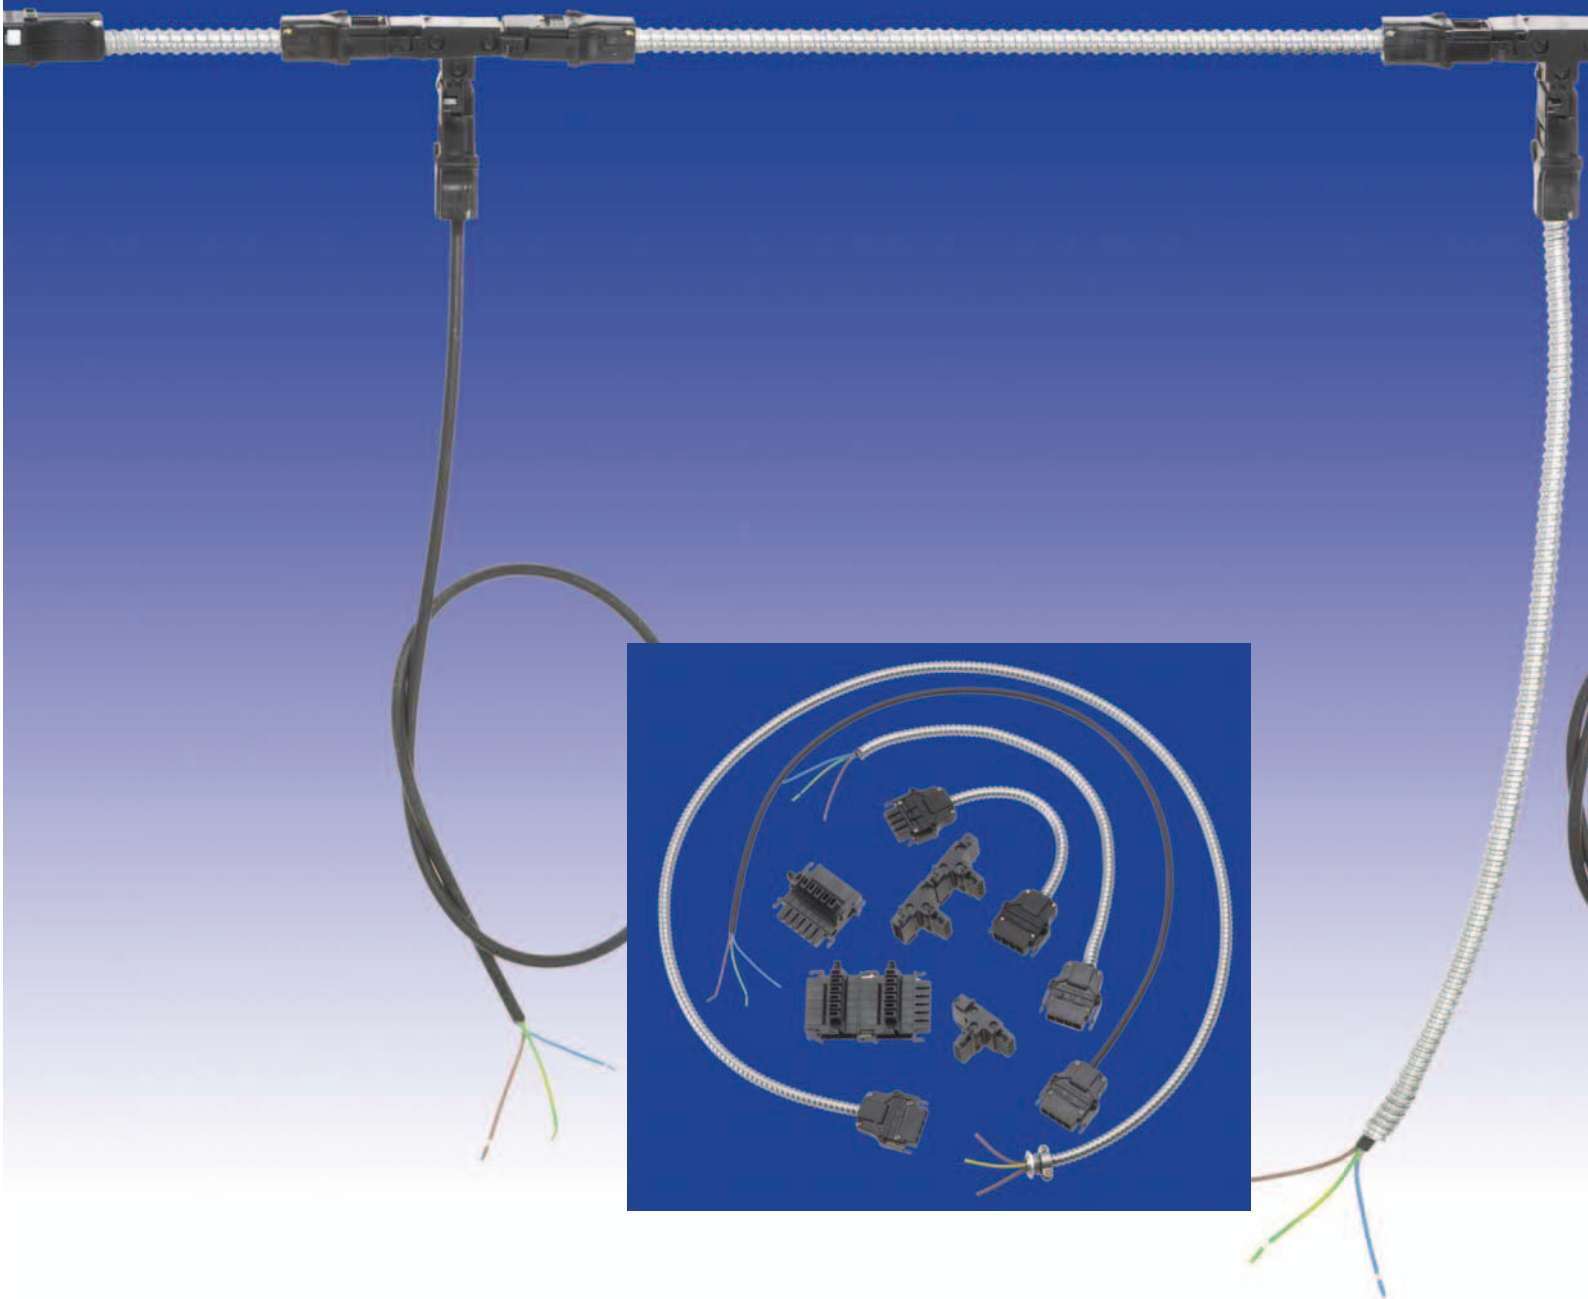

SYSTEM 32

Easy, rapid installation. Save time and money.

System 32 is a completely modular subcircuit distribution system for all fast-track lighting and power distribution projects. Manufactured to the client's requirements, the prefabricated components plus complementary power, lighting and control cables are delivered factory-wrapped on site for fast and efficient installation.

System 32 components are easy to install, simply push fit together for a completely failsafe installation – from distribution board to the furthest point of the circuit.

From specifier to end user – everyone benefits.

- **Infinitely flexible** – simply plug together, making changes quick and easy.
- **Space-saving** – maximum diameter of 9-circuit home run cables is 30mm; extenders 13mm deep and MDBs 80mm deep, optimising ceiling voids.
- **Factory-guaranteed installation** – triple tested, ensuring safe, trouble-free installation.

- **Labour-saving, money-saving** – less on-site testing, reduced fixing time by 90%, simple plug-to-plug installation and minimised handling mean less-skilled labour can be used for most of the project.
- **No reworking** – snap fixing and support cables are easy to relocate, plus System 32 is totally sealed and tamper-proof.
- **Improved project management** – late first and early second fix minimise or even avoid clashes with other services.

- **Less traffic between floors** – labour and materials kept to bare minimum reducing impact on personnel, security, hoists, and storage. “Just-in-time” delivery concentrates activity in specific areas.

- **Reduced maintenance costs** – screwless, modular technology reduces faults and allows future re-configuration without specialised tools.

- **Downtime minimised** – system changes are easily accommodated with minimum downtime.

- **Tax efficiency** – System 32 is classified as relocatable “fixtures and fittings”, thus qualifying for tax-friendly lease packages.

**In three standard specifications or customised.
Meeting all your installation needs.**

The standard System 32 range covers all popular installation needs:

Armoured Heavy Duty for installations in walls, above ceilings, and under floors. Tough, easy to fit and versatile.

Armourlite is a lightly armoured system, for wall and above-ceiling lighting installations. Flexible and reliable.

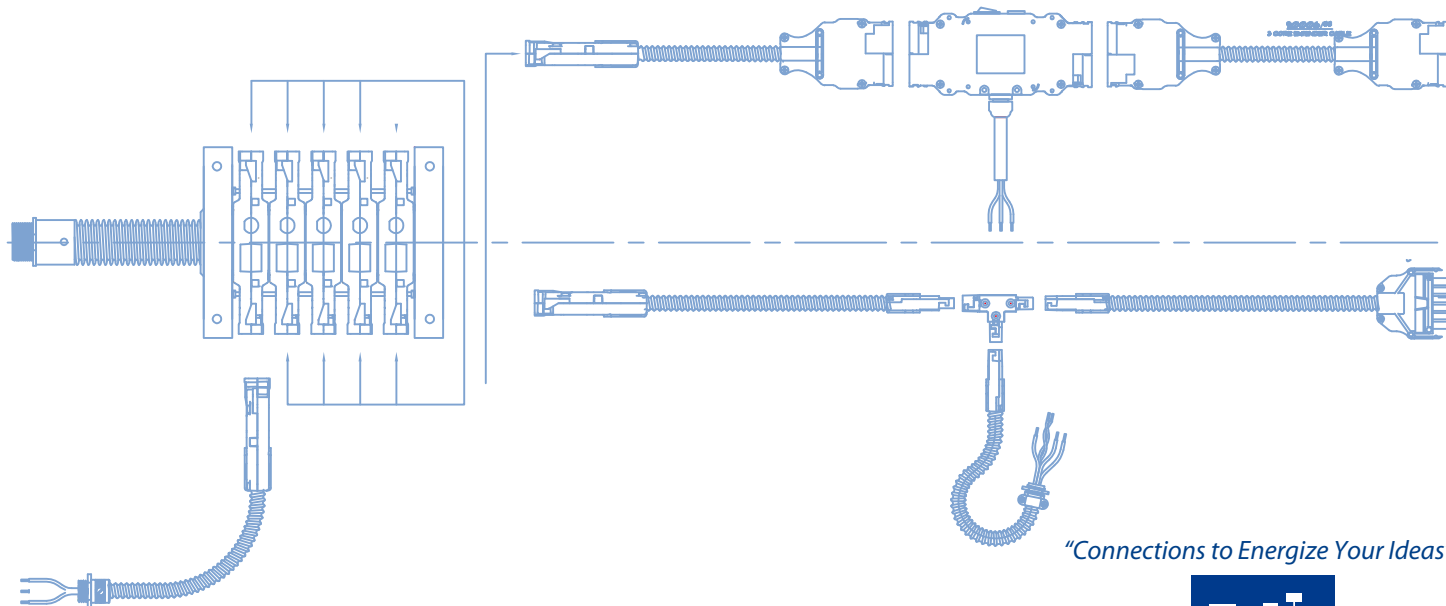

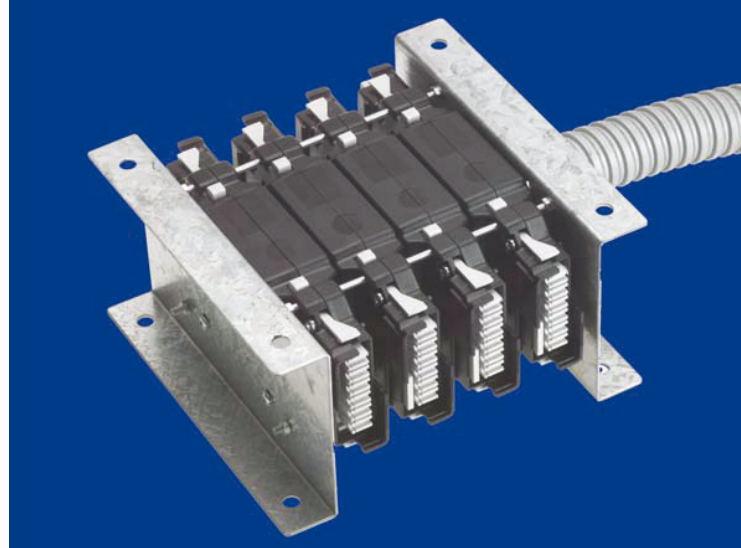

Unarmoured, for above-ceiling lighting and commercial installations. An extra-fast fit for lighting.

Modular Wiring Systems Ltd. can also customise its products for specialised installations, such as the health care sector, food and chemical industries plus extreme weather conditions.

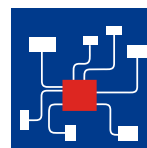

A range of metal clad (MC) cables is also available to complement the system.

SYSTEM 32

Modular Wiring Systems Ltd. was founded in 1995 and is one of the largest designer and manufacturer of prefabricated cables and systems. MWSL have been specified for a wide variety of fast-track projects throughout the United Kingdom and include hospitals, corporate headquarters, banks, schools & commercial buildings. All its products are designed and manufactured to comply with all current and upcoming British and European Standards.
